EDUCATION

Year	Degree/Certificate	Institution	CGPA/Percentage
2019-23	B.Tech in Electrical Engineering	Goel Institute of Technology and Management, Lucknow	9.08 (Till 6 SEM)
2019	Senior Secondary (Class XII)	Rani Laxmi Bai Memorial School, Lucknow (CBSE)	91.4%
2017	Secondary (Class X)	Rani Laxmi Bai Memorial School, Lucknow (CBSE)	10

EXPERIENCES

Software Engineer Intern | HCL Tech

Aug 2022 - Nov 2022

- Developed a Dynamic Price Model for E-Commerce Web application.
- Product price keeps changing as per market demand and supply.
- Complied pricing data for competitive analysis by performing Web Scrapping.
- Developed Game Management Website using django. Integrated Razor pay gateway.
- Technologies Explored:** Python, Django, MySQL, NumPy, Pandas, BeautifulSoup

Electrical Engineer Intern | Research Designs and Standards Organization (RDSO)

Jul 2022 - Aug 2022

- Train electrification system and power supply distribution in various coaches of train.
- Electric locomotive and how electric traction works using AC motor and DC series motor.
- Hierarchy in Indian Railways Department. Basic terminologies used in Indian Railways.
- Different types of fires, their causes and safety measures to avoid them.

Electrical Engineer Intern | Uttar Pradesh Power Corporation Limited (UPPCL)

Aug 2021 - Sept 2021

- Power GIS Substation Analysis using SLD(Single Line Diagram).
- Frequency Analysis for Rosting(Emergency and Scheduled both).
- Megger of Conductors, Power Transmission and Distribution study.
- Electricity Consumption Analysis using Data Log.

PROJECTS

Coin Market Cap | Final Year Project

Aug 2022 - Present

- Coin Market Cap is blockchain and web 3.0 based cryptocurrency listing & price tracking website.
- Provides high quality & accurate information about the market capitalization, volume & liquidity.
- Data collection is made from Coin Market Cap Application Programming Interface (API).
- Technologies Used:** Ethereum Smart Contract, Moralis, Next JS, Netlify, Tailwind CSS

Smart Dustbin using Arduino UNO | Academic Mini Project

Jul 2020 - Sept 2020

- Made a Smart Dustbin using Arduino UNO, Ultrasonic Sensor and Servo Motor.
- It make use of Ultrasonic Sensor to detect an object that came in front of the dustbin.
- Lid get open automatically whenever an object came in front of it and also closes automatically.
- Components Used:** Arduino UNO, Servo Motor, Ultrasonic Sensor and Battery (9V DC).

SKILLS

Programming Languages: C, C++, Python

Familiar With: PLC Ladder Logic, SCADA, MATLAB

Software Packages: Visual Studio Code, Atom Text Editor, Jupyter Notebook

Core Strengths: Power System (Transmission & Distribution), Electrical Circuits, Measurement & Instrumentation, Industrial Automation, Control System

OTHER ACTIVITIES

Member of GITM Innovation Cell

Sept 2021 - Jul 2022

- Submitted an innovative toy concept in 'TOYCATHON' 2021 that is organized by Ministry of Education.
- Submitted an article on "Electronic Waste Recycling" for URJA Magazine at GITM.

Extra-Curricular Interests

- Reading Books, Blog Writing & Working out
